Our Preschool programs are intentionally designed to be a natural extension of our family programming in both philosophy and in learning environment. Classroom experiences are thoughtfully designed to nurture the unique cognitive, physical and social-emotional development of little learners by utilizing a child-centered, developmentally appropriate, play-based curriculum, guided by the unique needs, interests and abilities of each child, and by the wonders of the natural world. The children participate in a daily balance of indoor and outdoor learning experiences in all types of weather. All children will grow together as leaders, problem-solvers, risk-takers and care-takers in a supportive learning community.
